SCHÜCO

DOORS - WINDOWS - SLIDING DOORS

WORLD LEADING BRAND

SEAMLESS REMOVING ALL FRAMES

The Seamless sliding door system features electrically integrated control, providing you with an exceptional and utmost comfortable experience with just one touch. The unique opening 90° corners is a groundbreaking solution that virtually eliminates all door frames, offering maximum transparency, seamless and perfect connectivity.

Schüco ASS Seamless Design

- ① Flush-fitted in the ceiling and floor
- ② Flush-fitted in the wall
- ③ Large vent dimensions of up to 3,200 x 3,500 mm
- ④ Slimline 31 mm face width of the mullion profiles
- ⑤ Up to 31 different opening types including unique opening 90° corners

AESTHETIC DURABLE OUTER, ELEGANT INSIDE

The new generation of aluminum-timber door and windows is a harmonious combination of function, performance and aesthetic. The room side of the WoodDesign block windows is clad with real oakwood strips, creating a window which combines the best of both worlds: the high performance characteristics of an aluminum window and the natural feel of a timber surface finish. With the WoodDesign solution, VIC brings the beauty of nature into your home.

Aluminum-timber door and windows.

7 different colour variations for oakwood surface finishes.

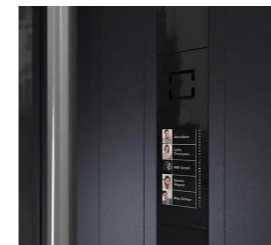

3 special handle design.

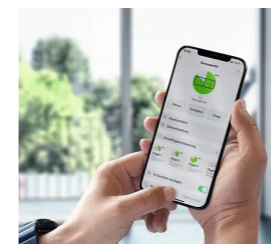

SMART THE IDEAL COMBINATION OF TECHNOLOGY AND ARCHITECTURE

Schüco Door Control System (DCS) and Schüco TipTronic Simply Smart – the automatic control systems can be integrated into the majority of Schüco doors, windows and sliding doors, allowing for smart and convenient operation while preserving an aesthetically pleasing and elegant design.

Schüco Door Control System

- Smart door communication and access control.
- Elegant and modern DCS touchscreen display.
- Keep an eye on everything at all times with integrated HD camera.

The Schüco TipTronic SimplySmart

- Pressing a button is all it takes to open and close windows and even large, heavy sliding units.
- The integrated weather sensor closes all of the windows automatically if the weather becomes unpleasant.
- The "night-time cooling" ventilation function with integrated sensors are coupled with internal and external temperature sensors and the windows are opened or closed depending on the temperature conditions.
- Control options range from manual methods such as handles and switches to modern devices such as tablets and smartphones.

SAFETY

ABSOLUTE SECURITY

VIC takes pride in offering world-class security solutions of aluminum door and window technologies that are tailored to the specific needs of Vietnamese homeowners. From the highest burglar resistance standards of RC 6 to the bullet resistance and blast resistance FB7-NS specifications designed for prominent and influential individuals, we have it all.

The SÄLZER® system provides maximum security against unauthorized intrusion and terrorist acts, all while maintaining an elegant, contemporary design and a wide range options to meet the architectural needs.

Burglar resistance

- Absolute burglar resistance solution up to the highest level RC 6 (intentional break-in, using high-performance tools) in accordance with European burglar resistance standard DIN 1627-1630.

Bullet resistance

- Outstanding bullet resistance solution up to the highest level FB7-NS (rifle armor-piercing bulletproof) in accordance with European bullet resistance standard DIN EN 1522-1523.

Blast resistance

- The latest blast resistance solution up to 500kg of explosives, in accordance with European blast resistance standards DIN EN 13123-2 | DIN EN 13124-1.

PROJECT REFERENCE

BINH TRI DONG VILLA

HCMC

Binh Tri Dong Villa is a sophisticated project with a focus on aluminum and glass systems, creating a wonderful, light-filled living space. Binh Tri Dong Villa helps owners enjoy an airy living space, close to nature, and maximize visibility by maximizing the use of aluminum and glass door systems, creating a seamless connection between the interior and the outdoor space such as garden and swimming pool.

PRIVATE VILLA IN DISTRICT 7

HCMC

Private Villa in District 7 is designed in a contemporary style that not only provides an open, youthful space that follows the trend of mingling with nature, but also demonstrates sophistication and science in every detail. The aluminum glass door and window system, in particular, plays an essential role in creating unique and outstanding value for this living space, bringing inspiring and classy experiences.

THUY NGUYEN VILLA

Hai Phong

"Thuy Nguyen" Villa is a one-of-a-kind architectural villa in Thuy Nguyen district, Hai Phong city. It creates a delicate and aesthetic blend between the inside space and the nature outside by using a minimalist but sophisticated architecture, as well as a scientific sliding door and folding door systems. This is not only a peaceful place to live, but it is also a symbol of art and class.

THIEN THANH HOTEL

Phu Quoc

Thien Thanh Hotel is well-known for its use of aluminum and glass doors and windows to create a wonderful relaxing environment for guests. The innovative and sophisticated design of aluminum glass doors allows natural light to enter every corner of the hotel, creating an airy atmosphere and maximizing energy savings. Visitors staying at Thien Thanh hotel can fully enjoy the natural landscape and blue sea endless right in the room thanks to the use of aluminum and glass door systems that optimize visibility and create a harmonious connection between inside and outside, resulting in a comfortable and impressive experience.

TAN PHU AEON MALL

HCMC

Tan Phu AEON is one of Ho Chi Minh City's most prominent large-scale and elegant projects. Maximizing the area used for aluminum and glass doors and windows is an important factor in creating the shopping center's attraction and aesthetic element. The interior aluminum glass door system provides a youthful, modern, yet elegant appearance. Simultaneously, through the transparency of the glass system, Tan Phu AEON creates an open, spacious, and light-filled space, allowing customers to enjoy a comfortable and airy feeling while shopping and entertaining here.
